# Who We Are

## Engineered in Europe. Realized in Canada

At Future Vision, we specialize in high-performance European windows, doors, and façades for architects, builders, and homeowners across North America. Rooted in architecture, we bring deep technical insight to every project — helping you navigate system options with clarity, precision, and purpose. From Passive House builds to bold custom homes, we deliver premium solutions that balance refined aesthetics with best-in-class performance.

## Projects of Every Size

### Tailored Solutions For Any Project

### Blue Mountain Chalet

A beautiful, functional home in Bluemountain Collingwood, designed for sustainable living and aging-in-place with a focus on accessibility, natural light, and long-term comfort.

### Mississauga Modern Reno

A thoughtful small-scale renovation focused on strategic upgrades to enhance energy efficiency and sound performance, creating a more comfortable, sustainable living space that improves overall quality of life.

### Curtain Wall Estate

The Atree Residence features massive custom glazing and a multi-story curtain wall, combining precision and flawless execution to turn ambitious visions into reality —no challenge too big.

### Sudbury Passive Duplex

Our passion projects. Using Passive House-certified windows and doors, we help achieve true energy efficiency, superior sound reduction, and lasting comfort—because performance should feel as good as it looks.

# Blue Mountain Chalet

## Designed with Care, Built with Clarity

This thoughtfully designed home in Bluemountain Collingwood combines intentional architecture with sustainable living, prioritizing function without compromising form. The layout, designed with aging-in-place principles, features optimized opening sizes, strategic glazing, and an elevator, all aimed at enhancing natural lighting and accessibility—within a net-zero framework.

The home's understated exterior balances elegance with practicality, highlighted by a corner glass window that offers panoramic sunrise views, connecting the interior to the natural environment.

The windows are designed for both performance and ease of use, featuring low iron, triple-pane tempered glass with dual low-E coatings for enhanced thermal efficiency and natural light. Lift-and-slide doors integrate indoor and outdoor spaces, while “Comfort Drive” soft-opening hardware ensures smooth, effortless operation—ideal for a multi-generational home focused on long-term comfort and accessibility.

*The home is incredibly quiet, the tilt-and-turn operation is effortless, and the comfort they've brought — both now and what we anticipate this winter — is exceptional. The process of acquiring the windows was smooth and created a positive opportunity not just for us, but for our contractor to experience a straightforward ordering, delivery, and installation process. From start to finish, the experience has been fantastic. We absolutely love the windows and highly recommend them*

*-Scott Garinther, Homeowner*

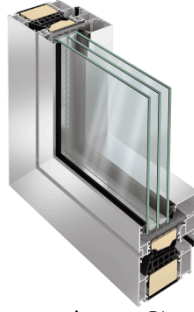

# Our Favourites

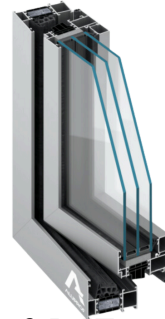

## Internorm HF 520

The most premium hybrid system on the market - blending warm, natural timber interiors with durable, weather-resistant aluminum exteriors. Featuring a concealed sash design and exceptional energy performance, the HF520 is perfect for homes that demand both style and substance.

## Schüco AWS 90.SI+

The ultimate window system — capable of massive openings and seamless frameless corners. Schüco's aluminum technology leads the industry with unmatched strength, precision, and sleek design, the best in its class. Engineered for residential and commercial projects, it delivers exceptional performance without compromise.

## Aluprof MB-79N

Looking for the best entry into European windows? The MB-79M strikes the perfect balance of budget and premium performance. With solid thermal efficiency, smooth operation, and reliable European hardware, it's the smart choice for high-performance projects without the premium price.

# Working With Future Vision

What to Expect When Working With Us

## 1. COLLABORATIVE CONSULTATION

We begin by understanding your goals — from aesthetic vision to energy performance targets and budget. Every project is unique, and we approach it that way. There's no one-size-fits-all solution here.

## 2. TAILORED SYSTEMS SELECTION

With access to a wide range of frame depths, glass specs, and profiles, we guide you through the right system for your performance, design, and budget. We come prepared with technical data - U-values, IGU, and more — to make informed decisions easy.

## 3. TECHNICAL SUPPORT

We speak architecture. Expect CAD blocks, BIM assets, and detail-specific drawings tailored to your exact window and door configurations. We work closely with your team to ensure seamless integration into the envelope.

## 4. DELIVERY & LOGISTICS

We coordinate production timelines and shipping to ensure smooth delivery to your site — anywhere in North America.

## 5. INSTALLATION SUPPORT

With over a decade of hands-on installation experience, our team understands the field. Whether you're using our crew or your own, we provide guidance to ensure systems are installed to spec and perform as designed.

## 6. CONTINUED SUPPORT

Our relationship doesn't end after delivery. We're here for post-install questions, system care, service coordination, and any technical clarifications whether you're a builder, architect, or homeowner.

Have a project in mind?  
We'd love to hear from you.

# Curtain Wall Estate

Design That Demands Execution

When it comes to scale, precision is everything. The Atree Residence features massive custom glazing and a multi-story curtain wall system — a true test of coordination, logistics, and flawless execution. For us, this wasn't just about supplying product — it was about delivering on vision. No matter how ambitious the idea, we're built to handle it. Dream big — we'll meet you there.
